## EXPERIENCE

---

### Junior Web Developer

January 2022 – April 2022

*Bitbuy*

*Toronto, ON*

- Member of the front-end web development team, responsible for optimizing front-end infrastructure, addressing bugs, and researching/planning improvements and new features
- Made over **100** contributions to the **Gatsby React** web application, working with tools such as **Drupal**, **Pantheon**, **AWS Amplify**, and **StorybookJS** to improve the product.
- Researched, planned, and implemented **UI/UX** improvements to the web application, contributing to the ongoing experience and design overhaul of the brand

### Software Developer

May 2021 – August 2021

*Year Zero Studios*

*Toronto, ON*

- Team lead for the Mental Health Score project, responsible for the development, management, branding, and marketing of this project
- Independently created the full-stack web application from scratch, leveraging **TypeScript**, **React**, and **Firebase**. The front end was designed using **Material-UI**, and the project was hosted on **Vercel**.
- Re-branded the project in order to target a new market of customers and successfully launched a strategic campaign, resulting in a **300% increase** in the user base.

### Computer System Analyst

May 2020 – August 2020

*OneTriam*

*Markham, ON*

- Independently undertook the system maintenance and security of various multi-million dollar company databases and user accounts via the **CyberArk** security suite.
- Created over **15 PowerShell scripts** in order to automate software functionality and the deployment of security tools for organizations.
- Collaborated with team members to create over **100 pages** of personalized software documentation for company clientele.

## PROJECTS

---

### JotDown | [github.com/UmerKazi/JotDown](https://github.com/UmerKazi/JotDown)

February 2021

- Developed a digital replacement to the traditional sticky note using **MongoDB**, **Express**, **React**, and **NodeJS** to help clear the pile of sticky notes on my desk.
- Constructed an intuitive and responsive UI with HTML and **Bootstrap**, hosted on **Heroku**.

### Taskit | [github.com/UmerKazi/Taskit](https://github.com/UmerKazi/Taskit)

January 2021

- Being unsatisfied with the current task management applications in market, I decided to create my own tool to simply and effectively keep track of my daily tasks
- Developed the application with **Swift** in **XCode** and implemented a **Firebase** back end. Leveraged XCode's storyboard functionality to create a clean and minimal UI

## EDUCATION

---

### University of Waterloo

Waterloo, ON

*Candidate for Bachelor of Mathematics in Mathematical Studies, Minor in Computing*

*September 2020 – Present*
