EXPERIENCE

Junior Web Developer
BitBuy   **January 2022 - Present, Toronto, Ontario**

· Member of the front end development team, responsible for optimizing front end infrastructure, addressing bugs, and researching/planning improvements and new features

Software Developer
Year Zero Studios   **May 2021 - August 2021, Toronto, Ontario**

· Team lead for the Mental Health Score project, responsible for the development, management, branding, and marketing of this project.
· Completely overhauled the service, taking it from its initial inception to a full-stack web application built using **TypeScript**, **React**, and **Firebase**. Front-end was created with **Material-UI** and the web application was hosted on **Vercel.**
· Re-branded Mental Health Score in order to target a new market of customers and successfully launched a strategic marketing campaign, resulting in a **300% increase** in the user base.

Computer System Analyst
OneTriam   **May 2020 - August 2021, Markham, Ontario**

· Independently undertook the system maintenance and security of various **multi-million dollar** company databases and user accounts via the CyberArk security suite.
· Created over **15 PowerShell scripts** in order to automate software functionality and the deployment of security tools for organizations.
· Collaborated with team members to create over **100 pages** of personalized software documentation for company clientele.

PROJECTS

JotDown | github.com/UmerKazi/JotDown
The Sticky Note Killer!
· Developed a digital replacement to the traditional sticky note using **MongoDB**, **Express**, **React**, and **NodeJS** to solve the problem of clutter on my desk.
· Constructed an intuitive and responsive UI with **HTML** and **Bootstrap**, hosted on **Heroku**.

Taskit | *github.com/UmerKazi/Taskit*
The Last Task Management Application You'll Ever Need!
· Developed an iOS application using **Swift 5** that allows users to keep track of their daily tasks.
· Created the back-end environment with **Firebase**.
